EXERCISE-6

main.py
Visualize
Run
Output
def find_max(nums):
if len(nums) == 0:
return None
Sort the list
nums.sort()
Maximum element is the last element
return nums[-1]
Test Case 1
nums = []
print("Output:", find_max(nums))
Test Case 2
nums = [5]
print("Output:", find_max(nums))
Test Case 3
nums = [3, 3, 3, 3, 3]
print("Output:", find_max(nums))
Output: None
Output: 5
Output: 3
